SUMMARY

Systems Analyst with 3-4 years of professional experience in data management, automation, reporting and systems optimisation. Currently completing a Postgraduate degree in Data Science, with growing focus on people analytics and data-driven HR decision-making

TECHNICAL SKILLS

- Programming: Python & R
- Machine Learning & Data Analysis: Pandas, Numpy, Scikit-learn, Statistical Analysis, Predictive Modelling, Data Cleaning & R
- Automation & Visualisation: Power Automate, Excel, Power Bi
- Tools: Git, Jupyter, VS Code, Spyder

EDUCATION

2019 - 2021

- **University of Zululand**
BSc Computer Science & Mathematics

2026 - Present

- **University of KwaZulu-Natal**
Postgraduate Diploma (PGDip) in Data Science

PROFESSIONAL EXPERIENCE

June 2024 -
Present

- **Toyota SA | Durban**
Senior HR Systems Analyst
 - Developed a python automation script that eliminated duplicate LMS assignments, significantly improving data accuracy and saving 30 minutes per processing cycle.
 - Built a Power Automate workflow that distribute 76 individualised emails with unique attachments registering processing time from two hours to 5 minutes and ensuring consistent data output.
 - Reduced HR system ticket volume by 70% by generating analytical insights, improving documentation and training HR business partners.
 - Created a compliance training dashboard combining LMS and headcount data enabling real-time tracking and trend analysis
 - Documented 4 payroll data processes for the sub S4 upgrade strengthening data covenant and workflow clarity
 - Supported bi-annual SuccessFactors LMS cycles through data verification, testing, configuration, and reporting, ensuring stable system performance and resulting in 0 audit findings.
 - Developed and maintained SQL queries and advanced Excel models to support data analysis, trend monitoring, and HR metrics reporting.

June 2022 - May
2024

- **Toyota SA | Durban**
Graduate Trainee: HR Systems
 - Supported HRIS data management activities including data validation audit and preparation of accurate employee data asset
 - Assisted with system testing and troubleshooting helping identify incorrect data inconsistencies across SuccessFactors modules.
 - Contributed to regular reporting cyclists by extracting cleaning and organising HR site for internal stakeholders.

PROJECTS

- **LMS Assignment Duplicate Avoider**

Python script, automates the process of tracking a training progress across multiple learning modules exported from LMS and ensures that users are not accidentally assigned training already completed or currently busy with.

- **Workforce Training Compliance Monitoring**

Analyse corporate compliance training completion data by integrating Headcount report with Learning Management System training records.

ACHIEVEMENTS & AWARDS

- RPA Business Analyst | 2023 Identified automation opportunities mapped processes and documented requirements
- RPA Developer | 2024 Built and deployed automation workflow to streamline business operations in parallel (Training)
- Power Platform Champion | 2025 Built low-code app and automated workflows to improve efficiency in my processes
